

HYUNDAI

Automatic Transmission Fluid Specifications

Four types of ATF are currently used in Hyundai vehicles. Each type of fluid has different friction and lubrication characteristics, so it is important to add the correct fluid. Incorrect ATF may result in reduced shift quality or transmission durability.

Refer to the chart for guidance.

YEAR	MODEL	ATF CHECK TEMPERATURE	TSB	ATF TYPE	ATF P/N
ALL	ACCENT	Above 167°F (75°C)	06-40-016	SPIII	00230-11000
ALL	ELANTRA				
ALL	SONATA				
ALL	TIBURON				
ALL	TUCSON				
ALL	SANTA FE				
ALL	AZERA
